Projects

- A Classic Snake game development using Core Java , Swing , AWT, Graphics , Exceptional Handling , OOPS, Abstract classes and Interfaces. I have built this game step-by-step from scratch and have discovered how to design the game board, handle user input, implement snake movement, and incorporate collision detection. IDE used: Eclipse
- Developed and Designed front-end AMAZON Clone website using HTML and CSS which contains the user Interface for search page. IDE used: Visual Studio Code
- Ongoing project on online Tourism Management System in Java. An integrated Desktop based Application developed for tourists. The main aim of this project is to help the tourist to manage, book hotels, packages and check sites. It makes all operations of the tourist easy and accurate. This project is built using Java , Swing , AWT, Graphics , Exceptional Handling , OOPS, Abstract classes and Interfaces. IDE used: Eclipse
